

Solutions Guide

# Wireless Network Installations

# Wireless Network Installations

A business Wi-Fi installation can offer cost efficiency (including fast design and set-up, easy integration with existing networks and ease of re-location).

Equipped with multiple Ekahau wireless survey kits, our engineers can design and quote to the necessary data cabling requirements for your wireless networks

**Further benefits of wireless network solutions include:**

- Easier access to information
- Faster response times
- An improved network infrastructure
- Faster collaboration and productivity
- A network for the future

Our indoor wireless network installations use pioneering equipment from leading wireless manufacturers, offering outstanding capacity, range and eliminating interference.

We also offer point to point wires for connectivity between multiple locations, and wireless bridges as a leased line replacement, saving you time and budget.

# Looking for a trusted partner?

## Where we come in...

Our wireless network installations offer the most reliable technology and manufacturer level support. We use the industry's latest solutions, alongside decades of installation experience. If you are looking for a wireless network solution, contact our team for advice...
